Skin  
is our  
thing™

THE CLINIC SKIN HEALTH  
TREATMENT MENU

STAGE 1.

## Revise

This is the first step in your skin health journey with a personalised hour consultation with our founder and head dermal clinician. We conduct a full skin analysis and discuss your skin's concerns and condition. In reviewing your skin and lifestyle factors, a bespoke treatment plan is prescribed - a combination of in-clinic dermal therapies, skin care and oral skin nutrition supplementation. All information is discussed in a private and easy to understand manner to ensure your comfort, confidence and enjoyment for the journey you are about to embark.

STAGE 2.

## Restore, Revise, Repair

At this stage, we begin restoring your skin back to a healthy state, once achieved, we can then revise and repair the skin condition or concern by implementing your customised treatment plan. We use the following revision methods:

- Peels and Medi-facials
- Fraxel Dual® Laser
- Customised infusion to Rejuvastamp®
- Skin Needling
- Light Therapy
- Healite II®
- Cosmelan®
- Depigmentation
- Alkaline therapy®
- Enzyme therapy®
- RP® Remodelling Procedure
- IPL Therapy
- Vascular Therapy
- Laser Genesis®
- 6 Layer Peel®

STAGE 3.

## Maintenance

Congratulations you've made it! It's now time to maintain.

Your skin transformation journey is now complete. However, we are exposed to environmental stress daily, and as yet we cannot stop the ageing clock, so it's important that we now maintain the results that have been achieved. We use the following maintenance methods:

- Healite II
- Bespoke skin care to use at home
- Bi-monthly treatment plan of enzyme therapy
- Laser Genesis and annual resurfacing treatment

Be good to your skin.  
You'll wear it every day  
for the rest of your life.

THE CLINIC  
SKIN HEALTH

## Clinical Skin Correction

### DMK Enzyme Therapy® from \$250

A core element of skin health, enzyme therapy works on correcting and supporting the skin's ability to function by dissolving dead cells and impurities trapped within the skin. This in turn restores vital cellular nutrition and oxygenation required for cellular regeneration. Enzyme Therapy stimulates collagen production, restoring structural integrity back to the skin whilst being suitable for a wide range of conditions such as ageing skin, sun damage, acne, rosacea and pigmentation. Warning, you will become hooked!

### Alkaline Therapy® POA

A specialised method of treating skin and a favourite of our founder, alkaline is multi-faceted in its uses. Treating conditions of both the face and body:

- **Keratosis Pilaris** (the small bumps found on the backs of arms) – treats the condition and symptoms.
- **Folliculitis of the beard and other regions of the body** – treats the condition and symptoms.
- **Rosacea** – treats the condition and symptoms.
- **Facial hair removal** (great for the fluffy vellous hair) – leaves the face looking amazing.
- **Pigmentation, Freckles and sun damage.**
- **Stretch Mark Revision** – softens and dissolves the tiny tears in the skin before repairing the tissue utilising Enzyme therapy®.
- **Acne** – treats the condition, not just the symptoms. Both face and body.
- **Medi Pedi®** – A one of a kind method, it dissolves dry, hardened and calloused skin build up from the feet without the use of any sharp blades or tools. Warning you will become unequivocally hooked!

### ECIT Skin Needling POA

This advanced skin needling treatment uses a electric machine which inserts tiny micro needles into the skin, stimulating your body's own natural collagen and elastin production and up to 400 times more collagen is produced from just one RejuvaStamp ECIT treatment. The stimulation of collagen and elastin from each treatment rejuvenates the skin from beneath, creating a plumper, firmer and tighter skin. RejuvaStamp not only works on the internal layers of the skin: it also smooths acne scars, tightens large pores and removes dead skin build up leaving the skin more youthful and radiant almost immediately. This treatment can be performed on most areas of the body.

- smooths wrinkles and expression lines
- improves skin texture and tightness
- improves skin pigmentation
- improves depressed acne scarring
- improves stretch marks
- tightens eyelid skin
- refines enlarged pores

### Remodelling Procedure (RP) POA

The REMODELLING PROCEDURES program is designed to target the effects of premature ageing and will revise skin that has suffered as a result of the sun or environmental damage. Any area of the body can be treated. The RP procedures will resolve fine lines, loose sagging skin, age spots (pigmentation), scarring. This procedure has skin preparation time and offers a dramatic result. Your clinician will discuss if you are the correct candidate for this treatment.

### 6 Layer Peel POA

DMK's PRO ALPHA SIX LAYER PEEL skin treatment is a highly effective resurfacing procedure for those who want dramatic results. Pro Alpha is a progress treatment that will give a rapid start to you seeing rapid results after the first treatment. The PRO ALPHA 6 Later Peel treatment is unique in the fact that it REMOVES and REBUILDS at the same time. By applying the full DMK CONCEPT, the skin naturally responds to what it recognizes and its natural functioning is quickly restored to leave you with healthy, glowing skin with no unsightly side-effects.

### AHA Peels from \$120

With a broad range on offer your dermal clinician, will customise a selection on the day of your treatment. It's our bespoke approach. These peels are great for dehydrated, dull and mildly congested skin.

### BHA Peels from \$150

We have a broad range of salicylic peels targeting skin concerns from pigmentation, congested to acne and ageing skins. Your dermal clinician will customised a selection on the day of your treatment, it's our bespoke approach.

### Retinol Peels from \$220

Vitamin A is clinically proven to dramatically assist in age-management, mild scarring, acne and pigmented skins. We have a broad range of retinol peels; a customised selection will be made for your skin by your dermal clinician.

### Cosmelan® Depigmentation \$1,100

A comprehensive depigmentation regime. This treatment will reduce melanic pigmentation, improve skin quality and even skin tone. Includes take home maintenance pack. Perfect for pigmentation, hyperpigmentation and melasma. A great alternative to laser.

### Fraxel Dual® \$1200

(includes post care kit, LED light therapy and post-treatment mask)

This is the proven laser resurfacing treatment providing high-quality results with minimal downtime. Expect smoother skin texture and a more evenly toned complexion through the removal of sun damage, hormonal and sun-induced pigment and dyschromia. Fine lines, scarring and pore size are also refined.

Skin health is the core of our philosophy and so is client satisfaction. When resurfacing your skin, we also assist in the reparative phase by applying a specific post-Fraxel mask on your face which immediately reduces inflammation and finally a light therapy treatment which will dramatically aid in healing, downtime and ultimately results.

### IPL Therapy from \$250

IPL is a proven, ideal treatment for the correction of pigmentation, thread veins, dilated capillaries, cherry spots, pigmented acne scarring, rosacea and small veins. Little to no downtime with the added benefit of collagen stimulation, adding a glow and lustre to your complexion.

### Vascular Therapy from \$250

Address small spider veins, vessels and broken capillaries and diffuse facial redness with this safe and effective laser treatment. Little to no downtime.

### Clinical Light Therapy Facials

Perfect for ALL skin types and conditions.
